Resolution
Asset Management

Glasgow

Resolution Asset Management is a highly regarded Asset Manager recognised as a focused, innovative market leader. The Group has a strong ethos of superior client service supporting investment performance for both institutional and retail clients. It believes in creating teams and team work, attracting talented individuals to become actively involved in shaping the success of the business. Integral to the current development strategy are the following two key appointments:

Treasury/Dealer

This opportunity is within the centralised dealing and treasury management unit. You will undertake responsibility for the Group's growing cash and foreign exchange assets and have the opportunity to "buddy" with the Money Market Fund Manager and develop longer term investment management experience.

You are likely to be currently working for an asset manager or bank and actively involved in dealing FX, cash and treasury assets.

A team player with strong dealing ability, you will possess excellent communication and presentation skills.

Treasury/Credit Analyst

We also require an experienced and enthusiastic Credit Analyst to work as part of the centralised dealing and treasury management unit.

With the ability to assess/take view on unsecured bank debt, you will analyse credit risk across the Money Market desk. With knowledge of structured credit (specifically asset backed commercial paper programmes, SIVs and term ABS), you will have an understanding of macro economics and ideally a knowledge of money markets.

These roles represent an exciting opportunity to join a leading Asset Management house in a highly successful and closely integrated team that is expanding and growing in the Money Market Fund arena.
